

RAILCAM

CONTACT

The Rail Cam features lightweight aluminum H-beam track which can be either flown or floor-mounted. A powerful and quiet trolley moves virtually any type of stabilized head including Gyron, Wes-Cam, or Libra. A MiniMote with Stabilized lens can also be used. The Camera Support Rail Cam system provides unparalleled stability even on a very long lens.

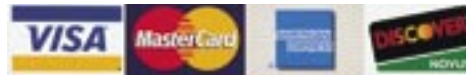

Camera Support Rail Cam systems are available in lengths ranging from 12 1/2 feet to 150 feet in 12 1/2-foot increments. Longer lengths are available.
